

Metric Ejector Pins

Plastixs Metric Ejector Pins are precision ground and nitrided for wear resistance. They are made of H-13 material with a core hardness of 35-40 Rc. Their case hardness is nitrided to 65-80 Rc with a surface finish of 4-5 micron.

Note: All dimensions and tolerances are in millimeters

| D Pin Diameter | H Head Diameter | T Head Thickness | R Radius | L = 125mm | | L = 200mm | | L = 250mm | |
|----------------------|-----------------------|------------------------|-------------|-------------|--------|-------------|---------|-------------|---------|
