

Mold Wiring Systems

PowerTECH mold wiring systems makes solving mold zone wiring problems easy and simple to fix. Each zone has its own zone-numbered terminal block position and they are already pre-wired to the connector for you. Two of the standard styles, one for DME type systems and one with HBE connectors (commonly used on HUSKY, Mold-Master, Gammaflux, MSI and other) are shown below. We also build special configurations for any application up to 256 zones.

For DME Type Systems

<u>Model number</u>	<u>Description</u>	<u>Price</u>
CT-0812	12-zones (10.440 Long x 3.290 wide x 3.125 high)	\$350
CT-0808	8-zones (10.440 Long x 3.290 wide x 3.125 high)	\$318
CT-0805	5-zones (10.440 Long x 3.290 wide x 3.125 high)	\$301
CT-8712-DM	12-zones (7.405 Long x 5.035 wide x 3.125 high)	\$350
CT-8708-DM	8-zones (7.405 Long x 5.035 wide x 3.125 high)	\$320
CT-8705-DM	5-zones (7.405 Long x 5.035 wide x 3.125 high)	\$320
CT-0624-SHD*	24-zones (15.848 Long x 5.015 wide x 3.125 high)	\$511
CT-0616-SHD*	16-zones (15.848 Long x 5.015 wide x 3.125 high)	\$484

* These systems are two, 12-zone Systems in one logical compact enclosure. The terminal blocks are wired 1-24

For HBE Connectors

<u>Model number</u>	<u>Description</u>	<u>Price</u>
CT-2206	6-zones (6.360 Long x 3.290 wide x 3.125 high)	\$264
CT-0412	12-zones (13.870 Long x 3.290 wide x 3.125 high)	\$350
CT-8712	12-zones (7.405 Long x 5.035 wide x 3.125 high) with 24-pin connector for power and 24-pin connector for thermocouple in two separate housings	\$350
CT-8712-D	12-zones (7.405 Long x 5.035 wide x 3.125 high) with 24-pin connector for power and 24-pin connector for thermocouple in one housings	\$350
CT-0624-D*	24-zones (15.848 Long x 5.015 wide x 3.125 high)	\$511
CT-0616-D*	16-zones (15.848 Long x 5.015 wide x 3.125 high)	\$506

* These systems are two, 12-zone Systems in one logical compact enclosure. The terminal blocks are wired 1-24

Power and Thermocouple Cables

The most common cause of cable failure is the cord type cable pulling out of the hood. The reason that happens is there is no way to tighten the gland tight enough to hold the cord in place without damaging the wires. **PowerTECH** solves this once and for all.

For D-M-E type systems

Power Cables		
<u>Model number</u>	<u>Description</u>	<u>Price</u>
CT-2512-10	12-zones, 10 foot power cable	\$221
