

GAMMAFLUX

GAMMAFLUX Global Hot Runner Control Solutions

www.gammaflux.com

A pioneer in Hot Runner Control Technology, Gammaflux continues to develop and deliver high-performance control systems that interlock with injection molding cells, anticipate heater failure and detect leaks before they lead to catastrophic failure. All Gammaflux systems feature the company's unique Triangulated Control Technology for the best temperature sensing controlling and actuation capabilities.

DYNACON

DYNACON Dynamic Conveyor Corp.

www.dynamicconveyor.com

Dynacon fully configurable modular conveyor systems can be reconfigured to meet changing production needs. Horizontal, incline, radius turn, and horizontal to incline conveyors are available in any size with, all with a 5-year warranty. These are the only conveyors on the market that can protect the user's investment when manufacturing requirements need a different conveyor solution.

REILOY WESTLAND

REILOY USA

www.reiloyusa.com

High performance screw and barrel products for the plastics industry. In house design and manufacture of custom components and industry leading products including the Eagle Mixing Screw and Reiloy Bimetallic Barrels. Reiloy (formerly Westland Corp), is a leader in the design of process and material specific injection molding and extrusion screws that can increase productivity and reduce quality issues by optimizing the melting and transfer of the plastic into an injection mold or extrusion die.
