

Fluid Distribution and Control [more info](#)

- **Award winning authorized distributor** for the full line of Burger & Brown Engineering products including **Smartflow[®] Water Manifolds** with aluminum or stainless steel construction. FasTie Quick Ejector Tie-In-System, Mold Temperature Controllers, Flow Meters and Regulators, Purge Valve, Thinswitch and Smartlock Mold Switches.

Processing, Cleaning & Maintenance [more info](#)

- **Slide Bulk and Aerosol** products for plastic molding, tooling and industrial applications. Mold releases, cleaners, lubricants, purging compounds and mold preservatives. Plastixs is a **Slide[®] Products Platinum Stocking Distributor**.

Hose, Tubing and Accessories [more info](#)

- **Kuriyama of America, Inc.** quality industrial hose and accessories including **Tigerflex** PVC and Urethane lined material conveying hose, couplings and clamps. FDA approved hose with or without grounding wires. **Kuri Tec** NSF hose and tubing from 1/8" diameter. Industrial rubber hose for a wide range of applications.
- **Norres Industrial Hoses and Hose Systems**, established in 1889, is a global player and a leading manufacturer of industrial hoses, hose systems and other innovative, high-performance plastic products.

Parts, Handling & Containment [more info](#)

- The original **Mold Shield[™]**, Mold Chutes and Skirts for containing injection molded parts.
- Plastixs **Drum Covers** with one and two ports and many sizes and styles of **Gaylord Covers** in stock.

Molding & Tooling Components [more info](#)

- **Plastixs** full line of **Ejector Pins** are stocked for fast delivery.
- **PLX Date Code Inserts** designed for trouble-free indexing.
- Self Lube **Parting Line Components** for precision alignment of mold sections.
- **Ionix Static Eliminator** reliable and safe automatic operation in both standard and high pressure models.
- **KIC Sintered Vents** are designed to optimize mold design and reduce the possibility of manufacturing defective parts.
- The **AirTECT** plastic leak alarm system is a unique device which gives protection against plastic leak damage, either within a hot runner mold or at the machine injection nozzle.

Water and Oil Filtration [more info](#)

- **Ferrogard[™] Magnetic Water Filter** Installs on Manifolds to remove iron contaminants.
- **Magnum[™] Clear 5 and Clear 10** Magnetic Water Filters will protect molds and machinery from rust and contamination.
- **Triple R Oil Cleaner** a leader in hydraulic oil filtration specializing in the plastic injection molding industry.

Hot Runner Cables and Connectors [more info](#)

- **EPIC Rectangular Industrial Connectors** HBE, HA, HD and HBS Series rectangular connector housings and inserts for **hot runner**, automation and machinery applications.
- **PowerTECH Junction Boxes and control cables** for Hot Runner Molds. 5-128 zones per Junction Box. Junction Boxes are pre-wired with terminal strips and include connectors.

Pneumatic Conveying [more info](#)

- Material handling system components including aluminum and stainless steel tubing, pipe elbows, and **couplings**. Featuring the full line of **Morris Coupling** products.
- **Rechner Sensors** is a specialist in capacitive sensing technology for automation, level control and quality control applications.

Heat Transfer Fluids [more info](#)

- **Paratherm Heat Transfer Fluids** for high temperature applications. Non-fouling, oxidation resistant, non-toxic, thermally stable, multi-component fluids.

Water Fittings and Valves [more info](#)

- **Plastixs Quick Connect Water Couplers** featuring Series "SC" Security Couplers with locking collar. Interchangeable with all series 200, 300 and 500 connectors.

Industrial Insulation/Heating Products [more info](#)

- **UniTherm Insulation Systems** offers high temperature insulation solutions proven to lower your energy bills, increase product efficiency, protects your employees, and lower ambient air temperatures.
- **Thermal Corporation** band and strip heaters, cartridge heaters, and RTD probes and sensors. Same day or next day shipment for standard and special configurations.

High Temperature Products [more info](#)

- **HiTemp[™] Water Manifold Systems** designed for high temperature water applications. All stainless construction supports temperatures to 400°F, 1000 psi
- **HiTemp[™] Oil Manifold Systems** designed for high temperature oil applications. Supports temperatures to 550°F
- **HiTemp[™] Hose** and hose and hose assemblies. **EPDM** for water up to 265°F, **Fluoropolymer** and **Stainless Steel** fabricated hose assemblies for water and oil application up to 550°F.

Plastixs Integrated Solutions [more info](#)

- **Custom Manifold and Hose Assemblies** fully configurable with a range of standard and customized options for optimal
