

FasTie[®] Quick Ejector Tie-In System

*FasTie system ties
mold ejector plate to
press ejection system*

Features

- Remains coupled during mold cycling for **increased "tie-in" reliability and reduced wear**
- **No extra machining needed** to the clamp or ejector plate during installation
- **Installs easily** into existing tapped holes
- **Mold maintenance and storage are simplified**
- Provides **complete ejector stroke**
- Provides a **sustained knockout retract force** during other molding operations
- Installation available for **center ejectors**
- **SpeedBar[®] adjustable length ejector** bar option changes lengths quickly without tools (**1" only**)
- **Thinswitch[®] Limit Switch** verifies ejector plate return before permitting the mold to close in injection molding machines

Description

FasTie Quick Ejector Tie-In System by SMARTFLOW[®] quickly "ties-in" the mold ejector plate to the press ejection system in an injection molding press, dramatically reducing mold change time. Ideal for presses where space is limited and the ejector system is difficult to tie in using solid knock-out bars. Three sizes are available: 1-inch, 1-3/8 inch and 2-inch models suitable for most presses and knockout configurations. System includes couplers, studs, center ejector bars and adapters, adjustable and fixed length ejector bars and air manifold.
