Conductive PVC Air Hose with PVC Cover

Uniquely different PVC air hose that prevents static build-up without the need of a static wire.

Construction:

- Tube — Co-extruded electrically-conductive PVC.
- Reinforcement — Spiral polyester yarn.
- Cover — Red weather resistant PVC.

Features:

- Continuous flexible conductive liner assures contact with fittings, without special preparation or clamping techniques.
- No wires to break when the hose is flexed.
- Distinctive color and branding allows easy identification.
- Silicone-free.
- One-piece lengths.
- Branded as “Conductive Air”.
- Non-marking non-perforated cover.
- Phthalate Free!

Applications:

- In-plant air service where static dissipation is required.
- Air lines for painting equipment.
- Applications requiring the use of grounded pneumatic tools.

Electrical Data:

- Resistance is less than 100,000 ohms per foot when tested with an ohmmeter, with normal open-circuit output voltage of 500 VDC.
- Note: Conductivity is through the inner liner only. To dissipate static electricity, the hose must be fitted with a grounded conductive coupling. When measured through the wall of the hose, the product demonstrates electrical insulation.

Service Temperature Range: +14° F (-10° C) to +150° F (+65° C)

† Note: Working Pressure decreases as temperature increases. Pressure ratings can only be obtained with proper coupling procedures.
