

ISOCOVERS ISO-HUB

Designing removable insulation covers for use on piping and equipment in commercial and industrial HVAC and power and process applications can sometimes be a challenge. While straight piping and simple geometries are straightforward, many components have either complex geometrical shapes or a number of protrusions and supports that need to be accounted for.

Fortunately, the ISOCOVERS Insulation Systems product line is designed for insulating straight sections of pipe, as well as complex surfaces such as valve bodies and other multifaceted configurations.

ISOCOVERS ISO-HUB Insulation Jackets are suitable for end fittings in piping systems, including steam traps, end caps, and blind flanges, or the like.

Applications:

- End caps, butt weld fittings
- Caps, socket weld
- End caps, NPT-threaded
- Screwed ends, threaded
- Float & thermostatic steam traps
- Blind flanges

MATERIALS:

- Stainless steel
- Nickel alloy
- Titanium
- Carbon steel
- Cast iron
- Brass
- Steel
- Aluminum
- Iron
- Copper
- Ductile iron etc.

ISOCOVERS

Insulation Systems

Use:

ISOCOVERS Insulation Systems are used for insulation of hot, cold, concealed and exposed piping in commercial buildings, industrial facilities and process or power plants. They are appropriate for all high-pressure and temperature applications ranging from -120°F (-84°C) to 800°F (427°C).
