

ISOCOVERS ISO-WRAP

Designing removable insulation covers for use on piping and equipment in commercial and industrial HVAC and power and process applications can sometimes be a challenge. While straight piping and simple geometries are straightforward, many components have either complex geometrical shapes or a number of protrusions and supports that need to be accounted for.

Fortunately, the ISOCOVERS Insulation Systems product line is designed for insulating straight sections of pipe, as well as complex surfaces such as valve bodies and other multifaceted configurations.

ISOCOVERS ISO-WRAP Insulation Jackets are suitable for straight sections of pipe that do not involve complex shapes, such as flanges and couplings.

Applications:

- Fittings
- Pipes
- Manifolds
- Flanges
- Strainers
- Valve & pipeline strainers
- Ball reducers
- Industrial HVAC equipment
- Reducing sockets
- Sockets parallel & taper
- Hex nipples
- Bronze screw valves
- Flange strainers
- Steam traps:
 - Thermo-dynamic steam traps
 - Float & thermostatic steam traps
 - Balanced pressure steam traps
 - Inverted bucket steam traps
 - Bimetallic steam traps

ISOCOVERS

Insulation Systems

Use:

ISOCOVERS Insulation Systems are used for insulation of hot, cold, concealed and exposed piping in commercial buildings, industrial facilities and process or power plants. They are appropriate for all high-pressure and temperature applications ranging from -120°F (-84°C) to 800°F (427°C).
