

Kuri Tec Leads The Way With Innovative, Durable Hoses & Tubing

Kuri Tec® offers a wide selection of durable, innovative hoses and tubing made in North America and utilized across industries and applications.

From pharmaceutical to food and beverage industries, [Kuri Tec hoses](#) lead the way with innovative and high-quality solutions built to last. Owned by Kuriyama, Kuri Tec products are manufactured in ISO 9001-2000 registered facilities in the US and Canada.

As a leader in thermoplastic products, Kuri Tec focuses on high-strength, high-quality hoses and tubing for food and water supplies, pharmaceutical, and pure chemical processing that meets NSF 51 and 61 standards.

Plastixs carries a wide selection of Kuri Tec products to fit every need you may have for hoses, tubing, and more.

What Makes Kuri Tec Hoses Different?

Not only are these products made in North America, but they're also built for applications involving strict compliance for health and safety. Kuri Tec offers a wide range of products designed to handle potable water, food, medicines, and more.

For restaurants and pharmaceutical companies alike, Kuri Tec products are the go-to for manufacturing of compliance-sensitive products. While cheaper products on the market exist, it will be hard put to find a comparable hose with the same durability and quality as Kuri Tec products.

Top-Selling Kuri Tec Products

One of the most widely utilized hoses is the Kuri Tec [CLEARBRAID® K3150](#). These hoses are reinforced with spiraled polyester that maintains their structural integrity, giving them a high pressure rating for this type of hose. Commonly used in the food processing, pharmaceutical and packaging industries, these hoses can tolerate temperatures up to 150°F.

Another popular Kuri Tec product is the [POLYWIRE® Plus K7300](#), which boasts a heavy wall and wire-yarn reinforcement design for vacuum and pressure applications. This crystal-clear PVC hose is nontoxic, silicone-free and can tolerate temperatures up to 150°F. Heavy-duty construction and electrogalvanized helical steel wire maintain the durability of the hose under both vacuum and pressure.

For the food and beverage industry, the [POLYSPRING® Series K7160](#) remains a crowd favorite. With spiral-wire reinforcement and a

glass-smooth interior, this crystal-clear hose is ideal for vacuum lines transporting air and water.

As a known and trusted manufacturer, Kuriyama boasts a high reputation for safe products with traceability of supply chains and fair pricing. Don't make the mistake of choosing the cheapest product on the market and subsequently jeopardizing the health and safety of your customers. With Kuri Tec, you know you're investing in a quality product that will last longer than cheaper competitors.

Prevent Production Mishaps (and PR Nightmares) with the Right Products

We've all heard of the stories of nationwide restaurant chains shutting their doors to address health and safety violations. Often, these mishaps are due to using poor quality products.

Contamination prevention is easier when you work with trusted products from known manufacturers. At Plastixs, we have decades of experience working closely with compliance-sensitive industries such as food and pharmaceutical manufacturing. We understand the nuances of the industry, what's at stake, and the right products for effective and compliant material handling.

If you're unsure of the right product to use (there's a lot of options out there – we get it), contact one of our Kuri Tec product experts who will help you determine the right product for your needs.
