- **Custom configurations** available
- **Custom screened company logos** available

Description

Plastixs Drum and Gaylord Covers improve the quality of molded parts and increase good production by preventing contamination of raw materials.

Constructed of breathable polypropylene fabric, these durable covers enable air movement as the material is transferred in or out of the container. Crystal clear vinyl viewing windows allow a quick visual check of material levels. All material bin covers include elastic binding around the wand openings and the bottom of the skirt for a secure fit. Gaylord style covers are available for positive and negative applications and feature adjustable Velcro straps for an extra snug fit. Drum covers are available in single or dual port styles.

Plastixs Material Bin Covers provide a rapid pay back based on scrap reduction and increased good output.

Drum Covers

Standard Drum Covers are sized to fit 19" to 24" diameter drums. Single or dual wand openings are elasticized to accommodate a 2" to 2.75" diameter vacuum wand. Ports may be zippered closed when not in use. Clear viewing window allows visual check of material. Elastic binding around skirt and optional draw cord provide an extra secure fit.

Model Number	Description
DC-001	1-port standard drum cover
DC-002	2-port standard drum cover
DC-001-DSE	1-port standard drum cover with draw cord

Gaylord and Octabin Covers

Our standard negative pressure covers have two 2.75" elasticized wand openings located in opposite corners with a clear viewing window in between. Ports may be zippered closed when not in use. Positive pressure covers have a single 6" diameter x 10" high center port, extra long skirt with belt and buckle for secure fit. All Gaylord covers feature adjustable Velcro tabs for a customized fit. Octabin style Gaylord covers are made to order and are available in many configurations.
