

Spiral Protective Wrap

Protection for all your critical hoses and connections

Features

- Designed to **increase the service life** of water, hydraulic and pneumatic hoses
- Unique rounded and beveled edges for **easy installation** on loose or mounted hoses and cables
- Spiral cut for **ultimate flexibility**
- **UV resistant**
- Suitable for equipment operating across temperature ranges: **(-40° F to +280° F)**

Description

Protect cirical hoses in even the harshest working conditions with spiral protective wrap products from Plastixs. Spiral Protective Wrap is an HDPE (High Density Polyethylene) protective wrap designed for heavy duty bundling and protection for water, hydraulic and pneumatic hoses. Protects against production losses and damage caused by abrasion or severe working environments. Plastixs carries a full range of spiral protective wrap to fit any size hose or cabling and available in black, blue, red and yellow.

Formula for Spiral Length

Hose OD ÷ Spiral ID x Hose Length = Spiral Length

Measurement Example:

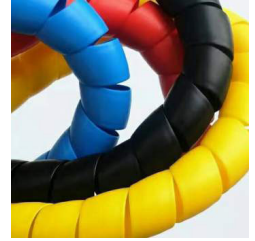

If you have a 33-ft hose with a 1.57" OD, using the recommended R40SSG, which has a 1.26" ID, you would require 41 feet of R40SSG.

1.57" OD Hose ÷ 1.26" ID of R40SSG x 33 feet = 41 feet of R40SSG

Spiral Protective Wrap (continued)

Selecting the right spiral protective wrap is easy.

Item#	Length Box Size	Hose OD Range	ID		Wall Thickness		Helix - Band Width		Min Hose OD	Typical Uses
