

HiTemp EPDM Superflex Hose

High Temperature EPDM Superflex Industrial Water Hose

Features

- Ideal for **high temperature water lines** for molds
- Recommended temperature **up to +250°F** (maximum operating temperature **up to +284°F**)
- Maximum operating pressure is **215 PSI / 15 BAR**
- **Flexible EPDM cover** resists abrasion, ozone, heat and weather
- **Cover design prevents blistering and bubbling**
- **Synthetic textile yarn reinforcement**
- Available in **3/8"**, **1/2"** and **3/4"** IDs and colors **red, blue and black**
- **In stock** for fast delivery
- This hose is **not compatible** with push-lok fittings
 - **Recommended:** Oetiker double-ear clamps and fittings with standard hose barbs

Description

Plastixs[®] HiTemp EPDM Hose is specially designed for high temperature water in applications such as mold temperature control. The tube is constructed of a smooth antistatic EPDM Nitrosamine-free rubber compound and is reinforced with synthetic textile yarns. Available in blue, red or black, the cover is designed to prevent blistering and bubbling and is resistant to abrasion, ozone, heat, and weather. Sold in standard roll lengths or per foot.

HiTemp EPDM Superflex Hose

High Temperature EPDM Superflex Industrial Water Hose

Specifications

Cover: Blue, red or black smooth EPDM Nitrosamine-free rubber compound

Reinforcement: Synthetic textile yarns

Tube: Black antistatic smooth EPDM Nitrosamine-free rubber compound

Recommended Temperature: Up to +250°F

Maximum Operating Temperature: Up to +284°F

Maximum Operating Pressure: 215 PSI / 15 BAR

Standard Lengths: 164 foot roll (3/8" and 1/2" ID), 98 foot roll (3/4 ID)

Fittings: This hose is not compatible with push-lok fittings

- **Recommended:** Oetiker double-ear clamps and fittings with standard hose barbs

Part Number	ID	Color	Working Pressure psi/bar	Roll Length
PLX-HT10Bx50m	3/8"	Blue	215/15	164ft (50m)
PLX-HT10Rx50m	3/8"	Red	215/15	164ft (50m)
