

You trusted us to protect your product. Now trust us once again.

Introducing a more efficient, and cost-effective way to keep metal out of your plastics processing.

Bunting's FF-MSCI, the all-new Manual Self-Cleaning Insert for your existing FF Drawer housing.

Bunting's new FF-MSCI is a magnetic drawer insert designed to fit FF4, FF6, and FF8 drawer housings. Simply replace your existing drawer with our **NEW** FF-MSCI. The neodymium magnetic cartridges of the FF-MSCI slide through nylon self-cleaning wipers that are attached to the drawer insert. As the cartridges slide through the wipers, ferrous particles drop off instantly, clearly enhancing rapid contaminant removal as often as necessary.

No more wiping. No more metal.

Save time cleaning and maintain high production standards without installing costly new equipment. **Trust us.**
