

Your Guide for Selecting the Right Mold Release

[Mold releases](#) create a barrier between your molds and resins, preventing them from sticking to each other, which can lead to part defects and mold damage. In the process, mold releases can extend the life of your molds and increase production throughput – as long as you’re using the right one.

With the most effective and widest range of mold releases on the market, SLIDE Products is the name to know for high-quality mold releases. At Plastixs, we’ve proudly represented SLIDE Products since 1989 and we can help you find the right mold release for your injection or blow molding application.

Best Selling Mold Releases

Cost-Effective & Widely Used

[SLIDE EconoMIST \(41612N\)](#) is an NSF-certified mold release that delivers a solvent-free, dry, light silicone spray to improve part release and optimize cycle time. It’s one of the most commonly used mold releases because of its effectiveness on a wide variety of injection molding applications and economical price. [Learn more >](#)

A Paintable Mold Release

[Paintable Mold Release \(40012N\)](#) permits post-molding painting or decorating, and is essentially a paintable version of EconoMIST. [Learn more >](#)

Food-Grade Release

[Pure Eze \(45712N\)](#) is a food and medical grade, paintable, neutral white oil-based mold release that is non-silicone based and does not contain lecithin. Many customers find Pure Eze effective for non-food applications with difficult to release materials. [Learn more >](#)

Cost-Effective Food-Grade (Non-Paintable)

[Econo-Spray 1 \(40510P\)](#) is an economical, food-grade, silicone oil-based mold release recognized by UL. Econo-Spray 1 is non-paintable. [Learn more >](#)

Let Us Help You Choose the Right Mold Release

There are many other specialty mold release options so whether you need light or heavy duty, medical or food grade, NSF-certified, paintable, silicone or non-silicone, *let us help you find the right mold releases* to protect your molds, maximize throughput, and drive greater productivity. Bulk options are available in addition to cans and Plastixs has what you need in stock, ready to ship.
