

## Plastixs<sup>®</sup> Receives 2020 SMARTFLOW<sup>®</sup> Distributor Award

*Plastixs has been named the SMARTFLOW 2020 Domestic Distributor of the Year for the 18<sup>th</sup> consecutive year.*

Presented by Burger & Brown Engineering, the SMARTFLOW distributor award recognizes superior achievement in sales and service of SMARTFLOW products. Plastixs has won the award since 2003 and is proud to be recognized for the 18<sup>th</sup> year running.

“Our injection molding clients love SMARTFLOW’s ability to cut down on changeover time. This has been especially useful throughout the COVID-19 pandemic when our food packaging and medical clients had a challenging time keeping up with demand – they couldn’t afford any downtime,” said Mickey Blyskal, Plastixs President and CEO. “We are proud to be a partner of Burger & Brown Engineering, and to have had so much success with them over the past two decades of our collaborative partnership. We look forward to continuing to represent SMARTFLOW for many years to come.”

Plastixs represents the entire line of SMARTFLOW products and can attest to the quality and durability of their water manifolds, flow regulators,

flowmeters, mold temperature regulators, SWAP<sup>®</sup> Valves, and more.

For custom projects, we work closely with the SMARTFLOW team to design and build products to exact specifications. With SMARTFLOW and the combined engineering and manufacturing expertise of Plastixs, we can deliver custom, turn-key solutions to customers.

### Top-Selling SMARTFLOW Products

Plastixs offers a variety of SMARTFLOW products. Below are a few crowd favorites.

#### [SMARTFLOW Aluminum Water Manifolds](#)

These manifolds are anodized for corrosion resistance, offering the highest-quality, one-piece extrusion with no welds. Designed to provide years of trouble-free service, these aluminum manifolds are durable and effective. [More >](#)

#### [SMARTFLOW Conventional Stainless Steel Water Manifolds](#)

These manifolds are ideal for high-flow applications that require durability and longevity. Available as a single manifold or as a parallel pair, the corrosion resistant, stainless-steel manifolds are capable of handling temperatures up to 250°F. Custom configurations and assemblies are available. [Learn more >](#)

### [SMARTFLOW Flow Regulators](#)

Plastixs offers two types of regulators: Brass Flow Regulators and Delta-Q Flow Regulators, which can be used in conjunction with other SMARTFLOW components including threaded end caps, IceCube™ flowmeters, and more. [Learn more >](#)

## Superior Products & Customer Service

At Plastixs, we pride ourselves on providing premier products and customer service. We are humbled to receive this latest recognition as the SMARTFLOW 2020 Domestic Distributor of the Year and look forward to another year of partnership with the SMARTFLOW team.

With over 20 years of industry experience, the team at Plastixs recommends only the highest quality, quality-tested products. [Contact us to learn more.](#)

## About Plastixs, LLC

Plastics processors, original equipment manufacturers and process manufacturers all rely

on Plastixs to keep their machines running smoothly in high temperature and pressure environments. They count on Plastixs to increase productivity, eliminate downtime and prevent small issues from becoming big problems, especially with injection molding, process cooling and material handling.

Plastixs product experts identify and deliver the right components, accessories and supplies that tie your systems together, including custom water manifold assemblies, high temperature hose assemblies and leading products from AIRTECT, Slide Products, SMARTFLOW®, Tigerflex®, Kuri Tec®, Norres, Morris Coupling, EPIC® and many others.
